

THERE WILL BE 9 BILLION PEOPLE BY 2050

FEEDING THEM will REQUIRE...

As much food to be produced in the next **40 years** as the past **10,000** combined

A significant **INCREASE** in crop production

GROWING MORE

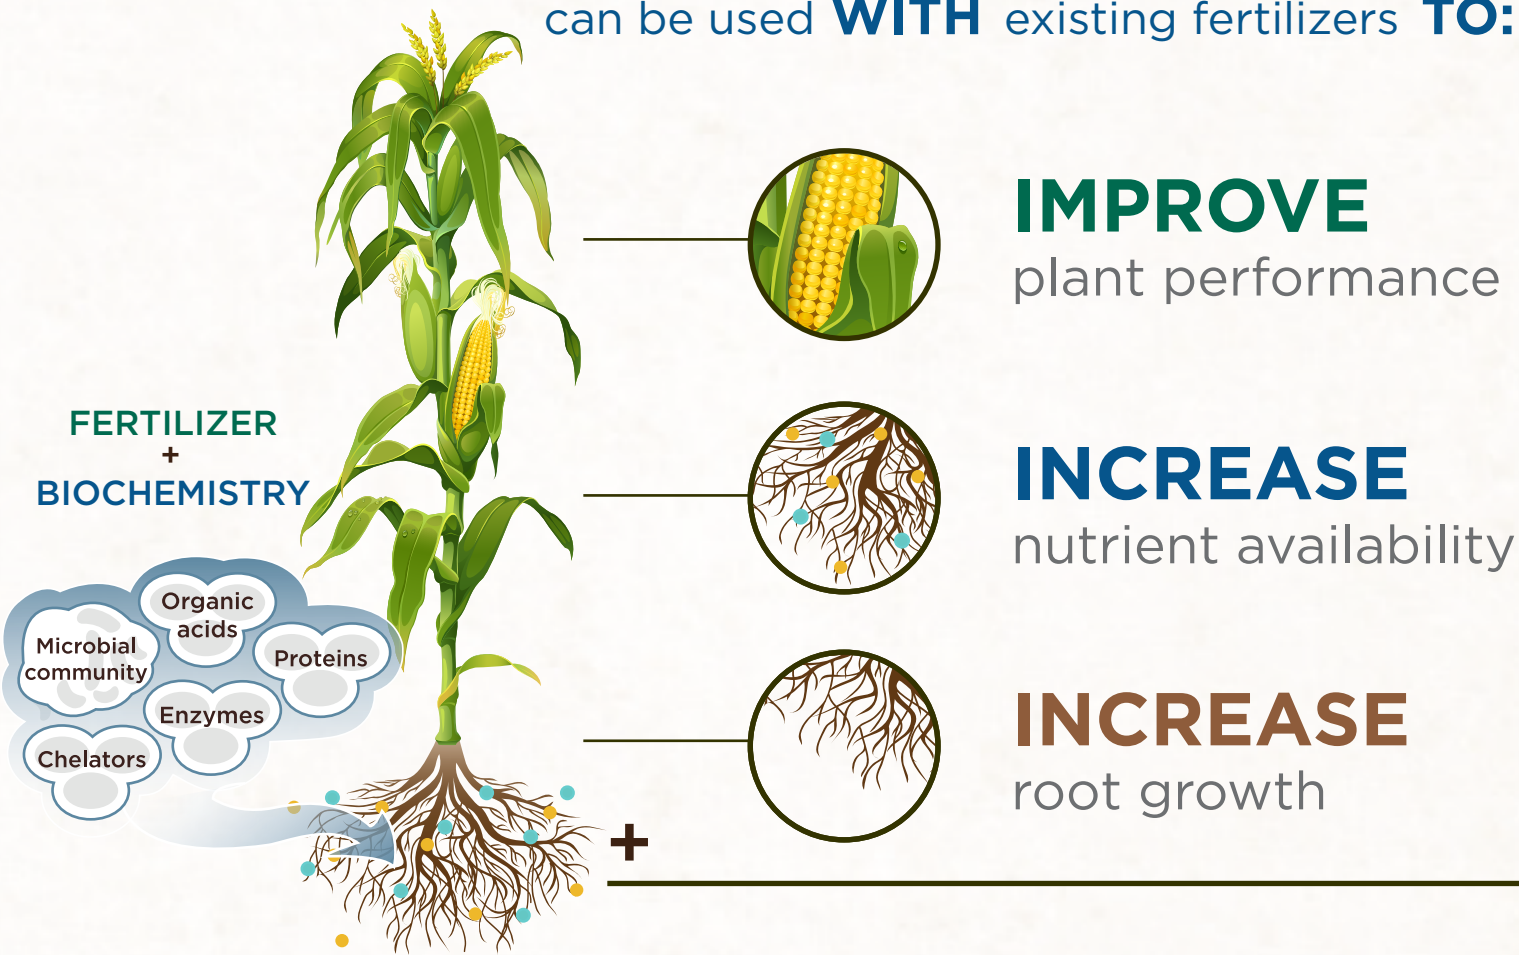

on the same amount of land as **TODAY**

BY using more **SUSTAINABLE**, more **PRODUCTIVE** practices

NEW PLANT NUTRITION SOLUTIONS BASED ON BIOCHEMISTRY

can be used **WITH** existing fertilizers **TO:**

= TRANSLATING INTO:

- 1.** **GREATER** nutrient use efficiency
- 2.** **HIGHER** yields per acre
- 3.** **ROI** for growers
- 4.** More **SUSTAINABILITY** in conventional and **organic** growing practices
