

ACCESSING THE FULL NUTRIENT VALUE OF CROP RESIDUE

PROBLEM

Post-harvest residue contains valuable nutrients, but the nutrients can't be used by the next crop until they are released from the residue and enter the soil profile.

SOLUTION

An application of Extract Powered by Accomplish® accelerates residue breakdown and maximizes nutrient release back into the soil. In this way, a grower's previous fertilizer investment can benefit the next season's crop.

Extract
POWERED BY Accomplish®

BENEFITS

- Faster crop residue decomposition
- Greater nutrient release from residue breakdown
- Easier plantability in the spring
- More even crop emergence
- Improved yield opportunities for next season's crop

Untreated

Treated with

Extract
POWERED BY Accomplish®

Extract PBA was sprayed Nov. 29, 2017. Stalks from treated and untreated parts of the field were pulled and split March 23, 2018.
