

# Unlock the Value of Your Crop Residue:

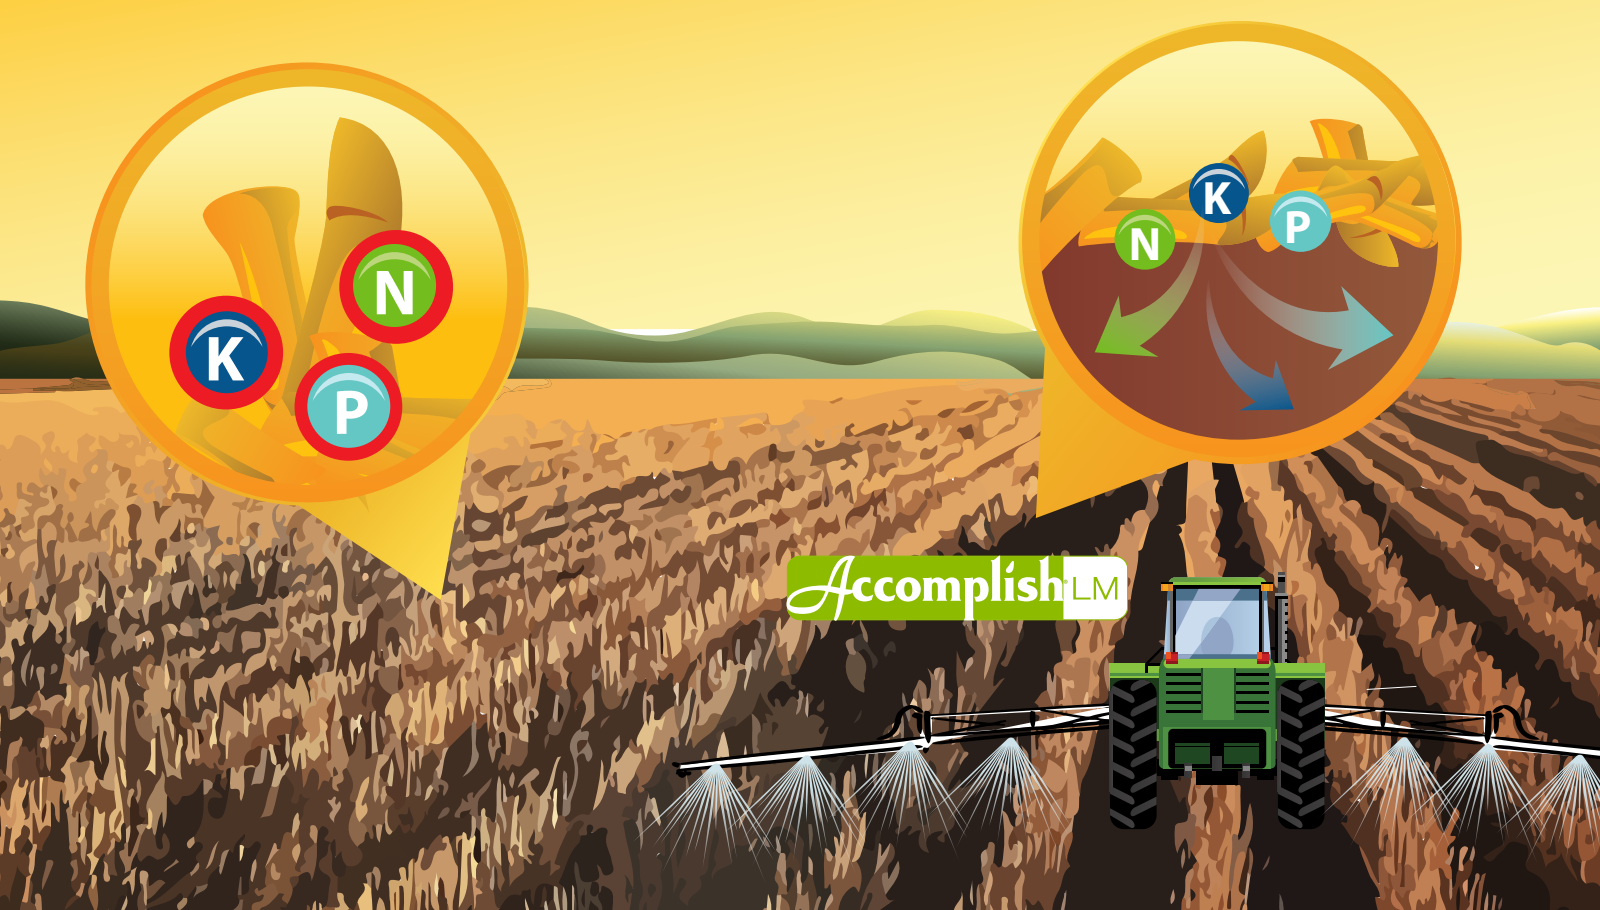

## Transforming Residue into the Nutrients You Need at Planting

### PROBLEM

Crop residue contains N, P and K, but must be broken down to release these nutrients. With lower commodity prices, *every nutrient counts*.

### SOLUTION

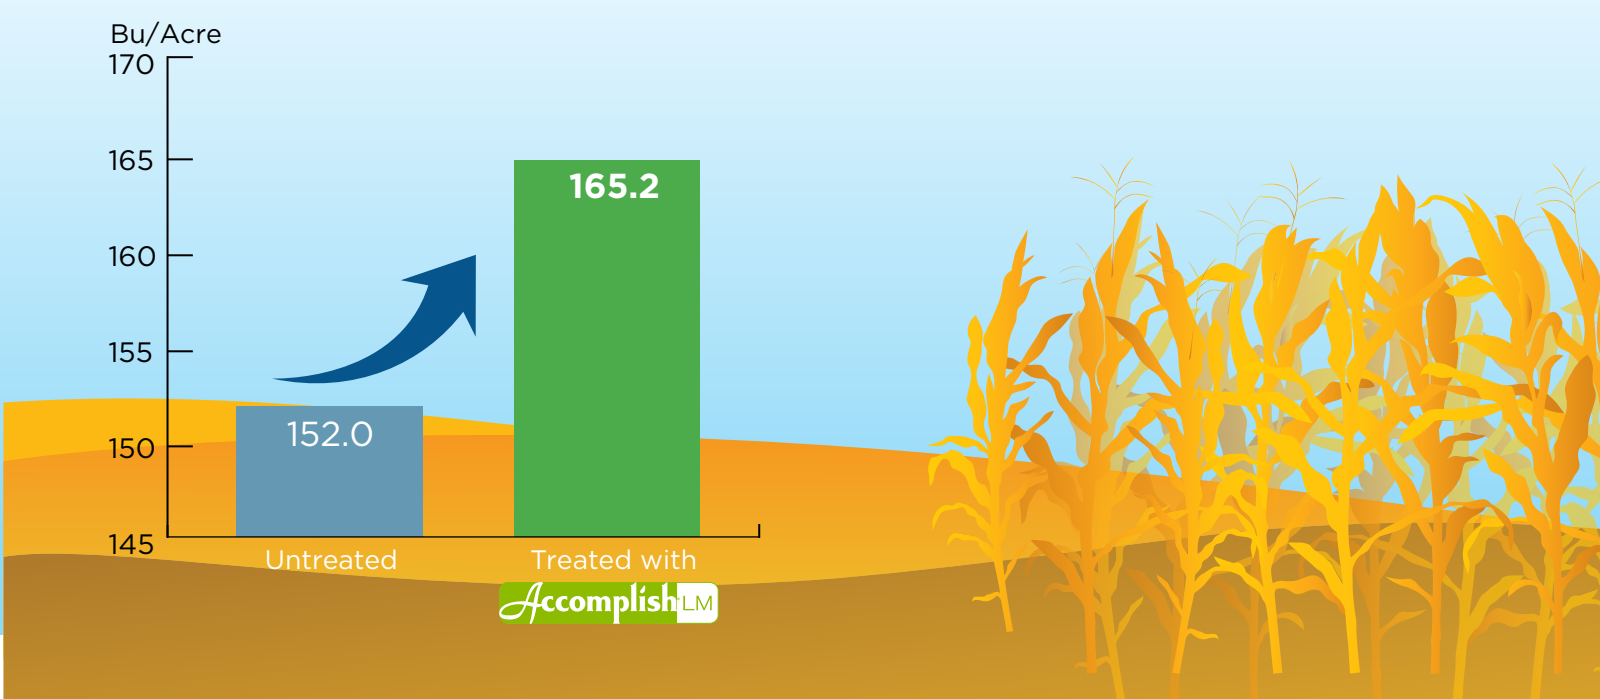

Growers can capture more ROI from their fertility programs with a post-harvest residue application of Accomplish LM.

**Accomplish LM breaks down residue fast, ensuring that nutrients from residue will be available at spring planting.**

### BENEFITS

Fast, efficient nutrient release that optimizes yield potential and ROI.

Corn - Jacksonville, IL (2012)

Accomplish LM applied in Fall 2011 on corn stubble at 2 qts/acre + 2 gals 28% UAN + 8 gals water

**13.2 bushel per acre increase**

**Based on Nature. Built on Science.**
